

This class is for students who want to learn the basics of cooking and sewing. No experience is necessary, just a desire to learn. Students will learn the basics of hand sewing and using a sewing machine. Two projects will be made, an apron and shorts. This will teach the basics and prepare any student for the next level of sewing. When the apron is completed, the student will begin using it in the kitchen while making many different goodies and learning how to use the kitchen appliances properly. The student should be ready to make several dishes in the kitchen at home.
